Abstract

One or two sentences providing a **basic introduction** to the field, comprehensible to a scientist in any discipline.

Two to three sentences of **more detailed background**, comprehensible to scientists in related disciplines.

One sentence clearly stating the **general problem** being addressed by this particular study.

One sentence summarizing the main result (with the words "**here we show**" or their equivalent).

Two or three sentences explaining what the **main result** reveals in direct comparison to what was thought to be the case previously, or how the main result adds to previous knowledge.

One or two sentences to put the results into a more **general context**.

Two or three sentences to provide a **broader perspective**, readily comprehensible to a scientist in any discipline.

²⁹ ## Methods

³⁰ We report how we determined our sample size, all data exclusions (if any), all
³¹ manipulations, and all measures in the study.

³² **Participants**

³³ **Material**

³⁴ **Procedure**

³⁵ **Data analysis**

³⁶ We used R (Version 3.5.2; R Core Team, 2018) and the R-package *papaja* (Version
³⁷ 0.1.0.9842; Aust & Barth, 2018) for all our analyses.

³⁸ **power anaylisis probablity finding something given it is there how big is it**
³⁹ **how many subjects there is the pwr package to do analysis go to github**
⁴⁰ **simulation presentations for power analysis.**

⁴¹ ## Results

⁴² **apa print function will make a table of the data you ran(anova table) if**
⁴³ **you write something and then put'r write something other tick-that treats as r**
⁴⁴ **code some this test significant tick r F value p value**
⁴⁵ **tick——a=1,2,3,sapply(a,fun=function(x)return (x+1)).**

46 **Discussion**
